

Airline Tamper Proof Seal Labels

Effective from 9th April changes in legislation from the New Zealand Civil Aviation Authority (CAA) Reference Part 109.61 require stricter controls on security of export packages and mail carried on international regular air transport services.

The procedures state:

- Every consignment of cargo or mail that is forwarded to the applicant's organisation is protected in a manner that enables the applicant's organisation to readily identify whether the consignment has been tampered with;
- The cargo or mail is not tampered with when sent by the known customer to the applicant's organisation.

In recognition of this Jenkins Group Ltd have developed standard labels available ex stock.

Custom print and specialised labels are available on request.

Please contact our customer services team on 0800536546 to discuss your specific requirements.

The tamper evidence labels are manufactured on a paper self adhesive stock designed for application to a variety of substrates hosting a hi-tack adhesive with specialty face cuts, which upon removal of the label visually provide evidence that the package has been tampered with.
